# Successful Wholecloth Tips

Quick Reference Guide

Free-Motion Framework  
Mini Wholecloth Quilt Workshop  
Hosted by Jen Eskridge

---

## Proportion

Keep reasonably consistent sizing of each motif as it relates to other elements in the project. Placing smaller sized motifs next to larger ones will create the effect of the larger design appearing to "puff."

## Breathing Room

Outline and echo certain motifs and designs to define the space and feature the quilting element.

## Density Balance

While it may be easy to get lost in the quilting, be mindful that each motif you stitch should be consistently spaced, unless it is a planned and calculated shift in design.

## Variety

Change up what quilted elements will be placed in the wholecloth. While making pebbles or feathers are a favorite, add some options in the design.

## Thread Color

Try using different thread colors to highlight some areas and draw attention away from other areas.

## Fabric Options

Use alternate fabrics such as satin, silk, velvet, or vinyl to bring an additional dimension to your wholecloth project.

## What To Do With Lines?

### Bounding Boxes

Stitch directly on the line and add your Free-Motion Fill inside

Use the marked line as guide to contain your Free-Motion Fill inside

### Part of the Design

Stitch directly on the line and feature it as the spine of an INSIDE motif

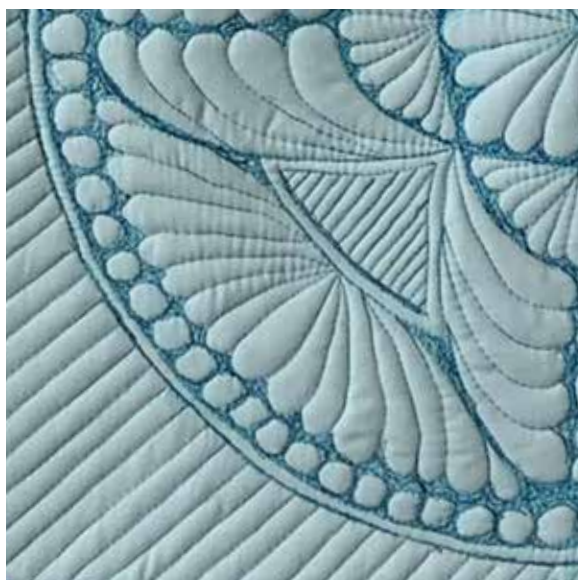

Stitch directly on the line and feature it as the spine of an OUTSIDE motif

Use the marked line as a guide for the path of the quilted motif

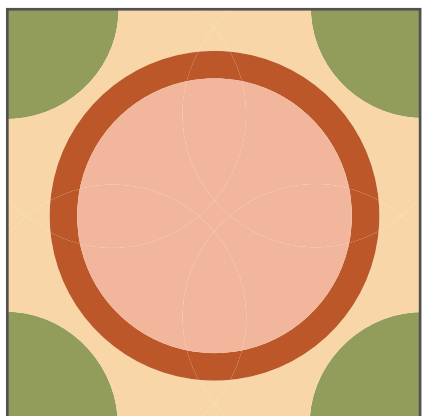

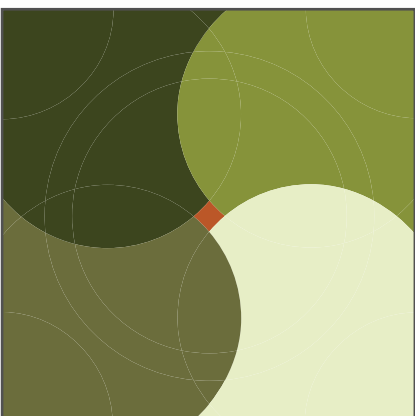

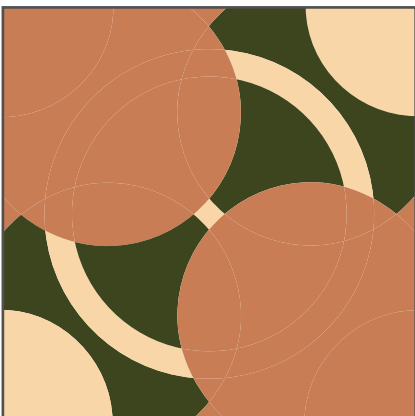

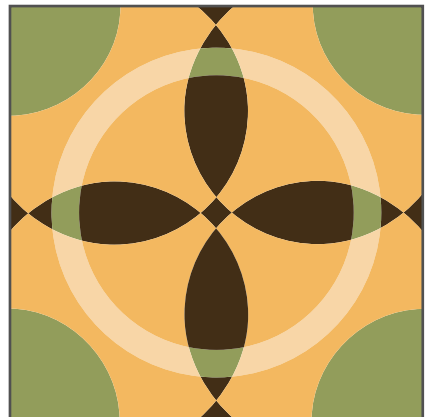

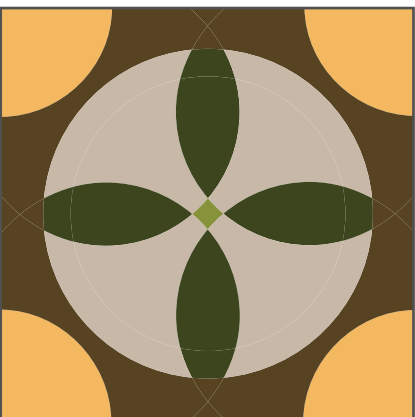

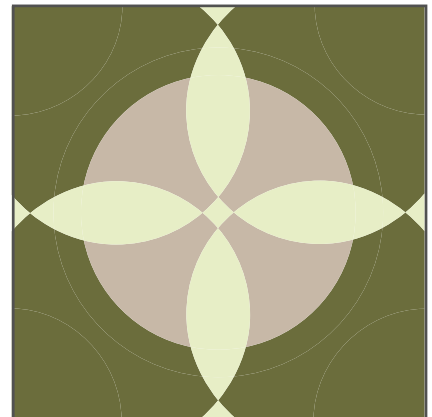

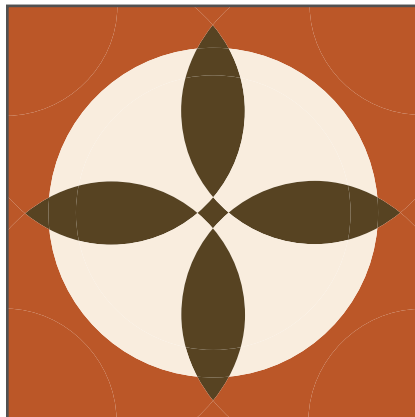

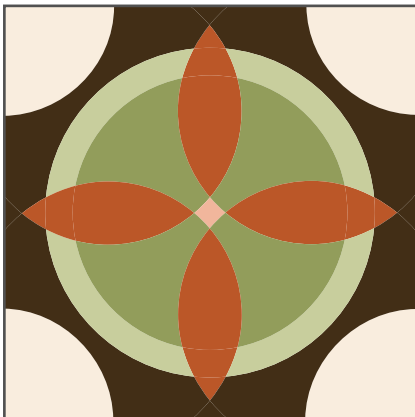

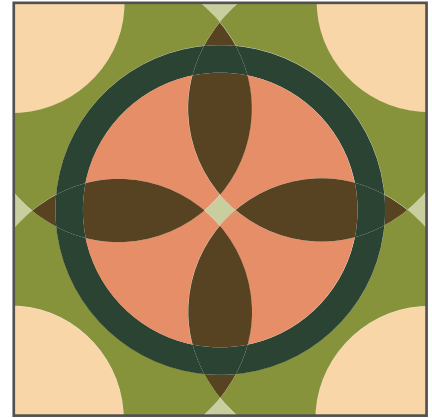

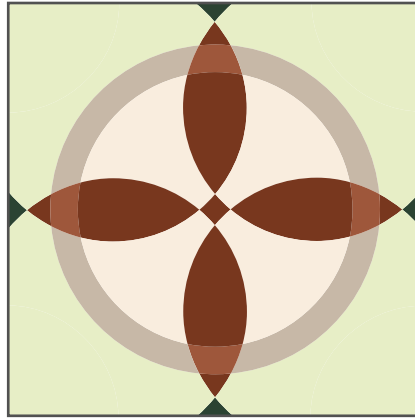

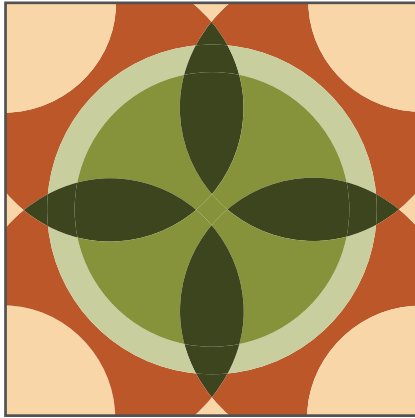

### Echo Lines to Divide Space

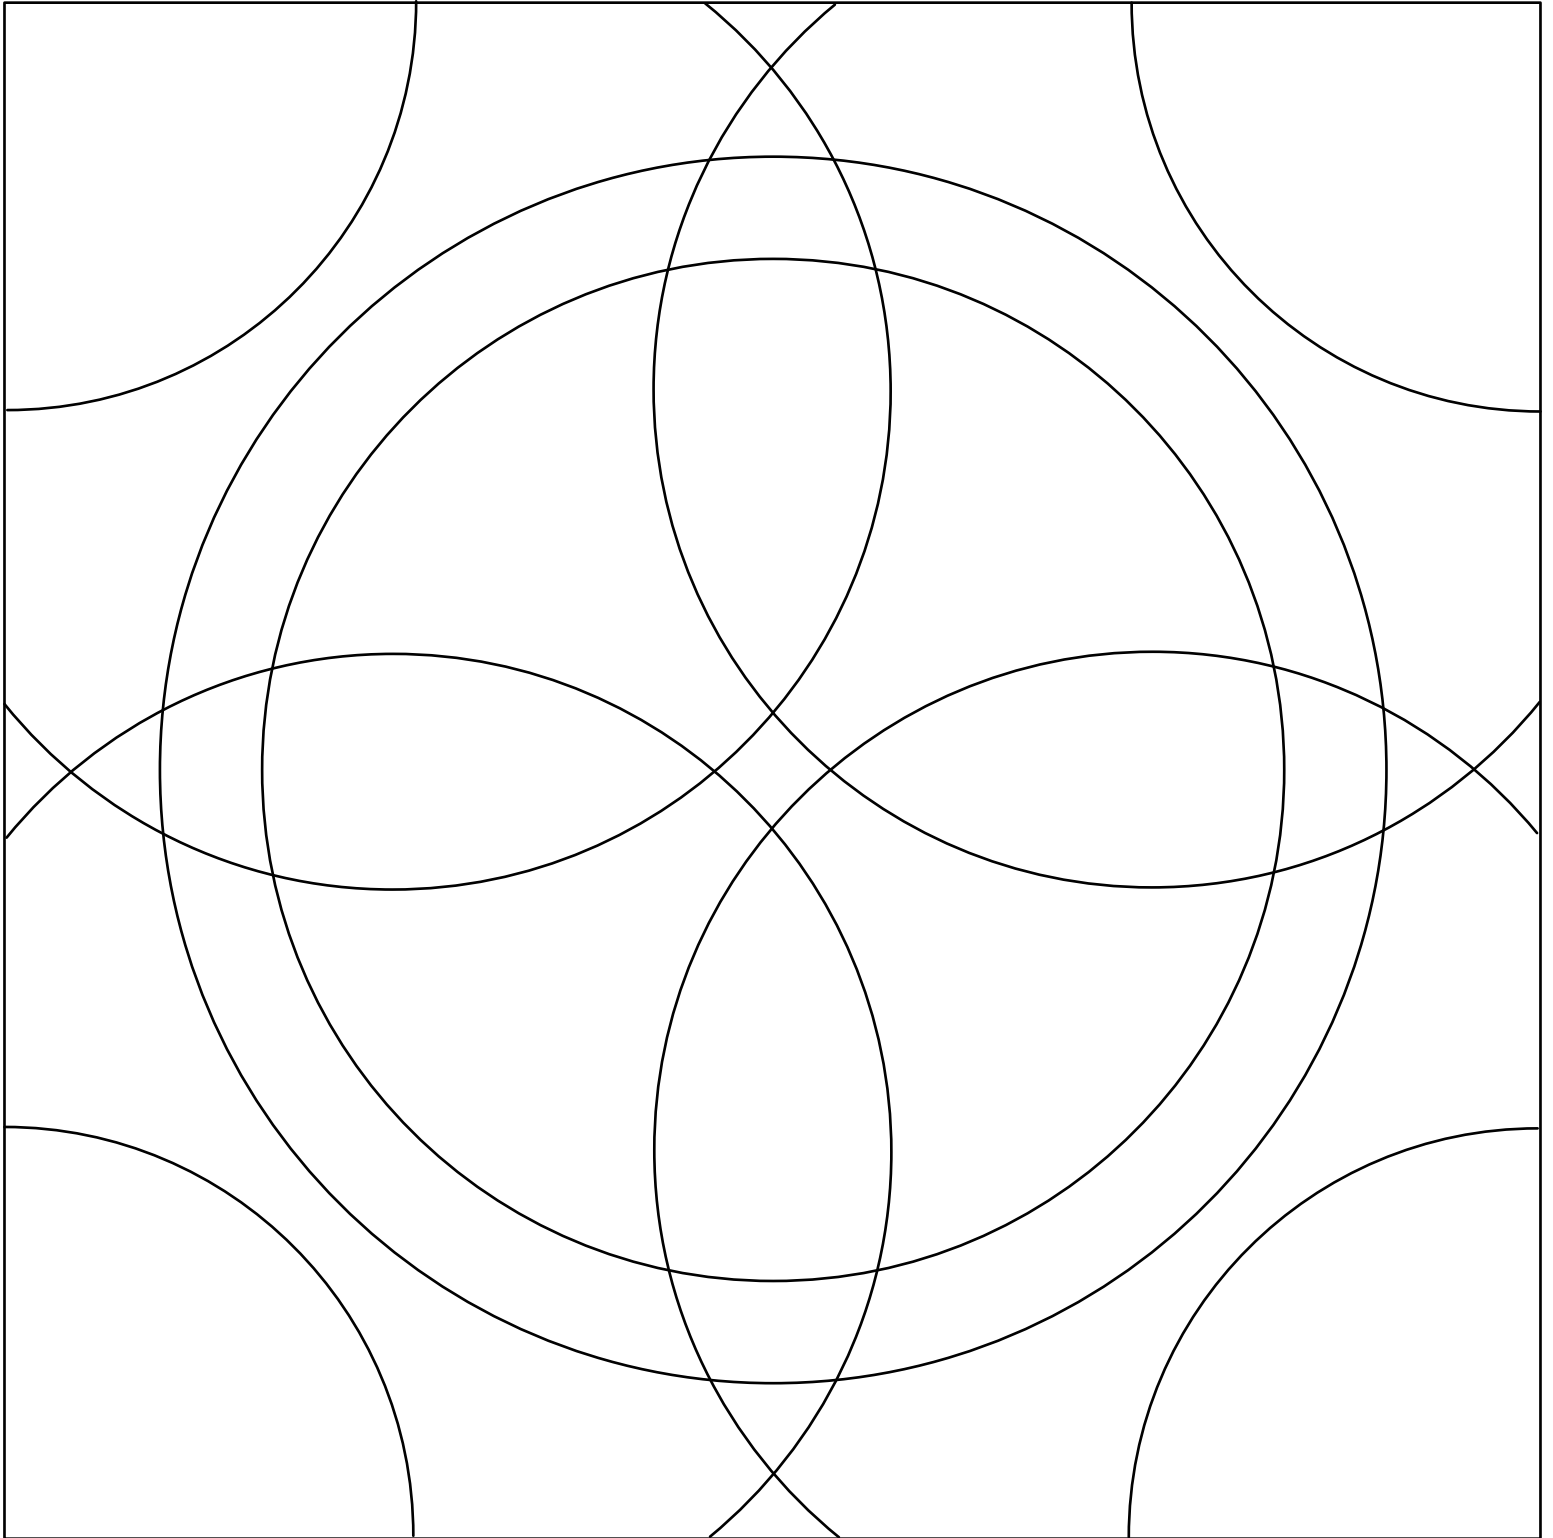

Stitch at 1/8" or 1/4" intervals around the line to give definition to your quilted motifs.

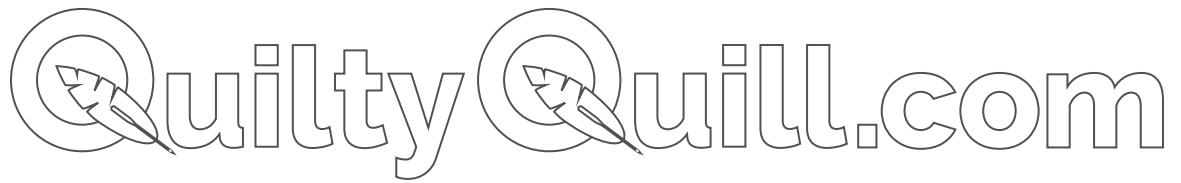

Roundabout Isolated Shapes Ideas
